

'POSITIVE STRIDES' Intervention & Educational Programs

CAUGHT IN THE NET

Covers a wide range of issues that youth today are faced with due to ever-evolving social networking sites and apps; designed to educate on topics such as cyberbullying and sexting, along with the consequences that are associated with engaging in such behaviours online. This program is often delivered in 4-6 sessions for youth aged 10-17.

TEEN INTERVENE

A brief, evidence based intervention program for youth aged 12-17 years who are suspected of experiencing mild or moderate problems associated with drugs and/or alcohol. Goal: to increase the youth's readiness to change and make healthier choices. This program consists of three one-hour sessions (with an optional parent component).

SUBSTANCE USE PROGRAM

This evidence based, in depth program is rooted in cognitive behavioural therapy, and designed to assist youth aged 12-17 in achieving goals of harm reduction. Key topics can include: self-discovery, understanding dependencies, understanding risk and protective factors, and key elements of change. The program is tailored to individual needs of the youth; involvement can range from 8-12 sessions.

MANAGING ANGER & AGGRESSION

With 25 different lessons to choose from, this evidence-based program is structured to meet each youth's individual needs. Key topics: change talk, anger triggers, assertion and communication skills, coping skills, conflict resolution, peer pressure, and avoiding violence. This program can be tailored to youth aged 7-17; number of sessions varies based on one's specific needs.

THEFT & VANDALISM

This brief intervention is focused on educating youth about the greater consequences of shoplifting and vandalism, allowing them to better understand 'the ripple effect' of their actions. This program is often delivered in 2-3 sessions and aims to deter youth from shoplifting and engaging in vandalism in future.

ANTI-BULLYING & HARASSMENT

This program is designed to help youth understand the risks involved with participating in bullying behaviours, while fostering positive social skills such as leadership, assertion, advocacy, and empathy for others. Goal: to educate our youth in problem resolution strategies, in order to decrease the use of bullying behaviours. Individualized sessions available for youth aged 7-17; can be tailored to both perpetrators and victims of bullying and/or harassment.

DEALING WITH EMOTIONS

This program covers a wide range of issues that youth may be struggling with, such as: communication skills, low self-esteem, anxious and/or 'low,' depressive feelings, peer pressure, and goal setting. Youth are provided with tools to identify and appropriately communicate about their range of feelings, and to reach and maintain a strong level of confidence, balance, and self-worth. This program can be tailored to youth aged 7-17; number of sessions varies based one's specific needs.
